

YOU BUILD.  
WE SHIP.

**YOUR CODE AND  
YOUR WORKFLOW.  
OUR PLATFORM.**

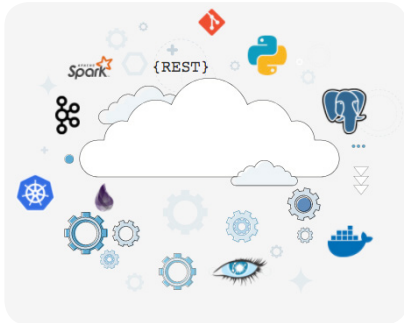

Skafos is the machine learning and deep learning deployment platform that elevates your data science workflow from proof-of-concept to production.

### USE FRAMEWORKS AND TOOLS YOU WANT

There is no “one size fits all” solution. Machine learning and data science is no exception. Continue to use the frameworks and tools you and your team love.

Skafos manages dependencies so you can focus on delivery. No more “it works on my machine” and not in production.

### ORCHESTRATION FOR FRICTIONLESS DELIVERY

Machine learning and deep learning is a series of events that need to execute reliably to ensure predictive insights are correct.

Skafos orchestrates your jobs seamlessly, guaranteeing they will run.

### MONITORING AND ALERTING

The best systems require robust logging and analytics. Live views into your jobs and workflows give you and your team full visibility to what is happening, always and across the entire system.

Skafos is the pipeline that glues it all together.
